

F-105R (TSD) Procedure: No Nut Products

1. No nut products are allowed in the grade (classroom) in which a student with nut allergy is currently enrolled. For example, if the student will be in Mrs. Hall's 1st grade class for the 2007-2008 school year, Mrs. Hall would have a "no nut policy", in her classroom, for that school year. This policy would follow the child from grade to grade (classroom to classroom) ensuring that he/she would be safe from exposure to nuts or nut oils.
2. Other classes (students) would be allowed to bring nut products into the school but not into the same classroom or near the child with allergies.
3. Signs will be posted on classroom doors reading "Nut Free Room" to reduce exposure to nuts and nut oils.
4. Any "specials" (music, art, P.E., etc) or after school programs would not be allowed to offer food that wasn't provided from the school kitchen ensuring that all food is nut/nut oil free.
5. Parents with children in the same class would have to sign a form stating they are aware of a student in their child's class with a nut allergy and they agree NOT to bring in products that contains nuts or nut oil. (This is to be reinforced throughout the school year- ex. Birthday treats provided by a parent)
6. Nuts and nut products can be brought from home for lunch.
7. Students, Staff and Support Staff must wash hands after any exposure to nuts or nut oils.
8. After school functions (open houses, concerts or special programs) will follow the "NO NUT" policy. Reminders will be sent home that foods should not contain nut products or nut oils.
9. Lunch tables will be cleaned with a bleach solution and hot water to wash away any nut oils.
10. Students with nut allergies will receive assistance in the lunch room when throwing away trash so as not to come into contact with nut oils at the garbage can.
11. Students with nut allergies will be allowed sit at the "school lunch" table (not home lunch table) as the school lunches are "NUT FREE" and this reduces exposure to nut products/nut oils.
