

Rutland Southwest Supervisory Union Technology Mission and Vision

Ira, Middletown Springs, Poultney, Tinmouth, Wells

Mission

To use technology as one of many tools to improve learning opportunities for students to acquire the 21st Century learning skills of;

- Creativity and innovation
- Communication and collaboration
- Research and information fluency
- Critical thinking, problem solving and decision making
- Digital citizenship
- Technology operations and concepts

To use technology to support and strengthen the curriculum by providing additional resources for instruction which will be integrated as a part of daily instruction to further motivate students as they strive for high academic standards and prepare for the workplace of tomorrow.

Vision

Students will be supported as they acquire lifelong learning skills through involvement in meaningful real world experiences which allow them to produce an authentic product they value.

Teachers will be facilitators and coaches for creative and innovative learning as students develop and pursue individual educational goals.

The Supervisory Union will have an infrastructure that will allow all users to communicate between schools, homes, and the world. Students and staff will have ready access to a full range of current tools and applications to further curriculum goals.
